University

2017-2020

SKILLS

Front-end development
React.js
Responsive development,
Git
VSCode
NPM
HTML + CSS
JavaScript

LANGUAGE

English
Creole

SUMMARY

Highly motivated, a self-starting developer based in New York. Seeking to launch a career building web applications and services. Familiar with the development and deployment processes for many web-based applications. I have learned that coding standards and best practices are critical for the long-term success of any software project.

WORK EXPERIENCE

ADMIN DASHBOARD

SheCodes

December 2022

HTML, CSS, and Javascript were used to build this Responsive Admin Dashboard with a light and dark mode theme for an e-commerce website. I used CSS Variables, Grid, Flexbox, and Media queries. CSS transitions and animations were used for cool animation effects.

REACT WEATHER APP

SheCodes

October 2022

This project was built using HTML, CSS, API, Bootstrap, and React.js. This application can search for weather anywhere in the world using OpenWeatherMap API and display the future forecast and weather parameters of searched cities.

CALCULATOR

SheCodes

December 2022

This project was built using HTML, CSS, APIs, Bootstrap, and React.js. This application returns multiple definitions of the searched word, synonyms, and pronunciation using (unofficial) Google Dictionary API. It also returns images related to the word searched using Pexels API.
